EXPERIENCE

Song Generation Specialist, Songful

Dec 2025 - Feb 2026

- Utilized AI tools and platforms to support music generation, editing, and enhancement
- Strengthened skills in remote communication, time management, and creative problem-solving
- Maintained high attention to detail in daily audio track reviews

Software Developer Intern, STMicroelectronics

Apr 2025 - Aug 2025

- Built with a team of 3 to develop an Inventory Management System using HTML, CSS, JavaScript, and Python, implementing secure authentication, role-based access, transaction auditing, optimized search functionality, and a streamlined UI for efficient item management

EDUCATION

Bachelor of Science in Information Technology

Aug 2021 - Apr 2026

Mapúa Malayan Colleges Laguna

- Consistent Dean's Lister (A.Y. 2021-2024)

Technical Vocational Livelihood Track Industrial Arts - Mechatronics Servicing Strand

Aug 2019 - Jul 2021

Calamba City Science Integrated School

- With Honors

PROJECTS

SafeStep: Integrated Smart Cane and Touch-Free Mobile Navigation App

Dec 2024 - Aug 2025

- Engineered a touch-free assistive mobile application using C# and the .NET MAUI framework with a XAML-based frontend, integrated with a smart cane system equipped with an ESP32-CAM module and ultrasonic sensors, utilizing Firebase. Enabled real-time obstacle detection, GPS navigation, and user guidance through voice and vibration feedback, with customizable preset destinations for visually impaired users.

SPATE: Apparel E-Commerce Platform

Nov 2022 - Jan 2023

- Designed a clothing-store platform using HTML, CSS, and JavaScript, along with the ASP.NET framework, featuring secure authentication, product catalog management, and a functional shopping cart. Applied input validation, password hashing, and role-based authorization to strengthen security.
